DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 25 June 2024 at 05:18 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels will be mostly Low today. However, there could be pockets of Moderate levels developing in England, due to the light winds and warm sunshine allowing the build-up of locally emitted pollution.

Tomorrow: Some similar conditions on Wednesday, leading to increasing areas of Moderate pollution for many parts of England and perhaps into Wales. There is also a risk of High pollution locally in the southeast of England.

Outlook: Some breezy conditions developing on Thursday, leading to a rapid improvement in pollution levels. Pollution levels expected to return to Low for the whole of the UK on Friday and Saturday.
